PROFILE

Python developer focused on Django and REST APIs. Experienced in delivering core product features, working in Agile teams, and improving application functionality. Passionate about backend development and building scalable web applications.

EDUCATION

BS in Computer Science

Punjab University

12/2021 – 07/2025

Lahore, Pakistan

Successfully completed with strong foundation in computer science principles and applications. Covered major areas including programming, databases, software engineering, networking, and modern web technologies.

TECHNICAL SKILLS

Languages & Backend: Python | Django | Django REST Framework | SQLite | MySQL | **Frontend:** HTML | CSS | JavaScript | Bootstrap | Tailwind CSS | **Version Control & Tools:** Git | GitHub | Jira | Slack | Agile Workflow | **Additional Exposure:** Angular (Basic) | Flutter (Basic)

PROFESSIONAL EXPERIENCE

Software Engineering Intern – MatchVet (SMC Pvt Ltd)

08/2025 – 11/2025

Remote

- Developed and shipped key features for a live veterinary care application, including Checkout flow, Pet Active Appointments, and Vet Services screens (Angular)
- Converted 10+ Angular screens to Flutter UI, improving UX responsiveness.
- Integrated 2+ backend API endpoints using Django REST Framework under senior guidance.
- Collaborating in Agile sprints using Git/GitHub, participating in code reviews and stand-ups
- Communicating with cross-functional teams for requirements and product improvements

PROJECTS

VEMS360

Full-Stack Developer

Tech: Python, Django, MySQL, HTML, CSS, JavaScript, Bootstrap

- Team lead and sole contributor in development, designing UI, and writing documentation.
- Built core modules, including event registration, booking, ticketing, and streaming placeholders.
- Solved major technical challenges in authentication (Google login) and payment integration limitations.
- Coordinate task assignments, weekly meetings, and project documentation.

Personal Portfolio

- Built responsive personal portfolio with animations and project showcases
- Implemented smooth scrolling, scroll reveal animations, and animated typing effects for an engaging user experience.
- Includes a downloadable CV, project showcases, skill progress bars, and social profiles.
- **Tech Stack:** HTML5, CSS3, JavaScript, Boxicons, ScrollReveal.js, Typed.js.

Quiz App – Django Project

Full-Stack Quiz Application

Tech: Python, Django, SQLite, HTML, CSS, JavaScript

- Implemented user login, quiz creation, attempts, score calculation, leaderboard & result history.
- Designed database with clean model relations using serializers and Django ORM.
